Subject: RE: I oppose Duke's latest rate hike for dirty energy

Dear Reverend Wilkins,

This is to acknowledge receipt of your email to the Public Service Commission of South Carolina. I am forwarding your email to our Clerk's Office for processing. Your email will become a part of Docket No. 2013-59-E and will be posted on our website under this docket.

Please let me know if you should require any additional information.

Sincerely,

Deborah Easterling
Administrative Assistant

South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Reverend Archer Wilkins

South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

In the long run, North Carolina can't afford these dirty fuel sources.

I smile every time I drive past solar panels here in NC near my home in Wendell. I traveled to Germany last year and was so impressed with their ability to get close to 50% of their energy from solar. Knowing that our region is on par with theirs helps me see the possibilities of success with solar. Please foster this and other long term renewable resources for energy production in NC.

North Carolina can't afford to put its environment on the line.

Sincerely,

Ginna Browning
